

SUMIT KUMAR NAIK

(+91) 7675012535 | naik.sumitk@gmail.com | www.linkedin.com/in/sumit-kumar-naik | github.com/Funtasti

Motivated entry-level full-stack developer with internship experience and hands-on project work. Combines practical experience building full-stack features with strong problem-solving, attention to detail, and a product-focused mindset. Delivers maintainable code in Agile teams, implements RESTful services and responsive frontends, and applies secure design patterns gained through real-world projects.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | CMR Institute of Technology

Graduated: July 2023

- GPA: 8.2

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, JavaScript

Frontend: React, HTML, CSS

Backend: Spring Boot, RESTful APIs

Databases: PostgreSQL, MySQL

Tools: Git, GitHub, VS Code, Eclipse

EXPERIENCE

Hitachi Vantara | Intern

January 2023 – August 2023

- Collaborated with product managers and senior engineers in Agile sprints to define and refine feature requirements.
- Implemented reusable React components and integrated them into the main codebase, improving UI consistency and maintainability.
- Developed responsive layouts using HTML, CSS and Bootstrap, ensuring cross-browser compatibility.
- Utilized Git for version control, conducted code reviews, and merged pull requests following team workflows.
- Quickly adapted to new libraries and frameworks, reducing onboarding time by ~30% and demonstrating strong learning agility.

PROJECTS

Track Your Health (React, Spring Boot, PostgreSQL)

- Designed and developed a scalable full-stack health tracking platform with a React frontend and Spring Boot backend, focusing on modular architecture and clean API design.
- Implemented secure, role-based authentication using JWT and Spring Security, ensuring protected access control and data integrity.
- Modeled relational data in PostgreSQL and built RESTful services with CRUD operations, server-side pagination, and optimized queries for better performance.
- Engineered a data-driven dashboard with tables using React hooks and API-based state management, enabling actionable insights from user activity data.

Personal Portfolio (React, Tailwind, Framer Motion, Vite, Vercel) | [Portfolio Link](#)

- Built a responsive, accessible SPA using React, TypeScript and Tailwind CSS with reusable components.
- Added page transitions and micro-interactions with Framer Motion, respecting user motion preferences.
- Optimized performance using Vite through code splitting and lazy loading, and integrated Lucide React icons for a lightweight, clean UI.
- Deployed on Vercel with production-ready build configuration, enabling fast global delivery and reliable hosting for the portfolio site.

CERTIFICATIONS

- Java Full Stack Web Development – FLM Academy (In progress)
